- Marketing Cloud Administrator.
- Vlocity Platform Developer.
- MuleSoft Certified Developer.

Experience

Organization	Designation	Duration
Tech Mahindra	Associate Solution Architect	(03/2016) – Present
Gembrill Technologies	Senior Programmer Analyst	(07/2015) – (01/2016)
Chain-Sys	Senior Salesforce Developer	(02/2013) – (06/2015)
Polaris Financial Technology	Associate Consultant	(10/2011) – (01/2013)

SKILLS

- Salesforce Development
- MuleSoft
- GIT
- Workbench, Data Loader, Anypoint Studio

EDUCATION

- BACHELOR OF COMPUTER SCIENCE AND ENGINEERING • 2008 • ANNA UNIVERSITY

PROJECTS

Project	Customer Master
Client	Werner Enterprises, Inc (USA)
Role	Salesforce Architect, Senior Developer, MuleSoft Developer

Environments	Apex Class, MuleSoft Any point Studio

DESCRIPTION:

Customer Master is a project where Client wanted to send all the insert/ update of certain object's records to be sent over to AS400/Mastery via MuleSoft.

RESPONSIBILITIES:

- ➢ Integrated Salesforce & MuleSoft using Change Data Capture (CDC) to capture events.
- ➢ Developed MuleSoft Flow to Subscribe Salesforce to get all change events from the Salesforce Org.
- ➢ Worked on Data Weave to transform raw Salesforce information to desired JSON output which is to be sent to AS400/Mastery.
- ➢ Developed M Units to have 100% coverage of Mule Flow.
- ➢ Also included Error Handling logics in Mule Flow.

Project	ELDT (Entry Level Driver Training)
Client	Werner Enterprises, Inc (USA)
Role	Senior Developer
Environments	Lightning Aura Components, Apex & Wrapper Class, Triggers, REST API Integrations, Custom Objects & Fields, Change set

DESCRIPTION:

Werner Enterprises is an American transportation and logistics company which recruits N number of Truck Drivers wanted to have their Drivers take Evaluations tests on Werner provided Tablets. The project mainly focuses on getting the Drivers Evaluations completed on Salesforce and transform their data to Government Trainer Provider Registry (TPR) for validations. Developed REST API Integration with JWT (JSON Web Token) where we need to submit request with Algorithm RS256 Signed JWT.

RESPONSIBILITIES:

- ➢ Developed Controller Classes & Apex Triggers.
- ➢ Developed Custom button to work on the REST API Integration to submit request to external system using Wrapper Class.
- ➢ Created Test Classes to test the functionality and achieve the code coverage.
- ➢ Moved the changes from Sandbox to Environments through Change Set.
- ➢ Created Permission Sets to give access for specific users to submit request.

➢ Involved in Requirement gathering from Business & also developed Document as per Client discussions.

Project	SFDC Support and Enhancement
Client	NBC Universal (USA)
Role	Senior Developer
Environments	Apex Class, Triggers, REST API Integrations, Custom Objects & Fields, Change set

DESCRIPTION:

Sales tool is a financial application used by the NBCU to project and track multi-year revenue. It provides the function to aggregate estimated sales entered by sales representatives globally and allows variance analysis for different budget versions throughout the fiscal calendar. Quarterly data is captured and maintained by users on a real-time basis. Sales tool provides the ability to manage forecasted information, budget version control, and master data maintenance.

RESPONSIBILITIES:

➢ Perform End to End Analysis
➢ Requirement gathering
➢ Requirement analysis and development in sandbox
➢ Developed Apex triggers, Classes, Visual Force pages, Batch apex to implement the custom functionality.
➢ Automated business processes using Workflow
➢ Build reports, dashboards.
➢ Coordinating status calls.

➢ Project	SWIFT Meeting
Client	AppExchange Product
Role	Senior Developer
Environments	Apex Class, Triggers, REST API Integrations, Custom Objects & Fields, Change set

DESCRIPTION:

Integration of Salesforce with Citrix GotoMeeting & GotoWebinar product. On Successful authentication with Citrix, able to create Meeting in Citrix from Salesforce, sending invitation emails through Salesforce, post meeting information in social media like Facebook, LinkedIn and twitter. Also grab the completed meetings&webinars from Citrix to salesforce...

RESPONSIBILITIES:

- ➢ Analyzed the App Exhange Product.
- ➢ License Management App by Salesforce.com
- ➢ Requirement analysis and development in sandbox
- ➢ Developed Apex triggers, Classes, Visual Force pages, Batch apex to implement the custom functionality.
